

Non-Functional Test Scenarios

1 - Performance Testing

- **Scenario:** Measure signup form load time under normal and high user load.
- **Expectation:** Page should load within 3 seconds for 95% of users under normal load.

2 - Security Testing

- **Scenario:** Ensure that password fields are not exposed in browser memory or logs, and input is masked.
- **Expectation:** Password is encrypted and stored securely, input is masked (•••••), CSRF and XSS protections in place.

3 - Usability Testing

- **Scenario:** Validate that the signup form is responsive and usable on various screen sizes and with screen readers.
- **Expectation:** Form should be fully accessible, keyboard-navigable, and responsive on mobile and tablet devices.
